

EZEKIEL OLOGUNDE

CYBERSECURITY LEADER | CYBER GRC & ENTERPRISE RISK | AI SECURITY GOVERNANCE | RESEARCH & ACADEMIC LEADERSHIP

(410) 588-9558 | Birmingham, AL | ologundeomotola@gmail.com | linkedin.com/in/ezekiel-ologunde | ezekeologunde.github.io

EXECUTIVE PROFILE

Cybersecurity leader, independent consultant, researcher, and educator with 12+ years of progressive technology and cybersecurity experience across Cyber GRC, enterprise risk, security architecture, AI security, digital forensics, and higher education. Leads risk assessments, governance advisory, security architecture, and AI/vendor risk engagements for SMB and mid-market clients while contributing to cybersecurity curriculum strategy and workforce development. Doctoral researcher in Cybersecurity Analytics focused on AI-enabled security governance, strategic risk acceptance, Zero Trust, AI/ML threat modeling, and NIST RMF alignment. Brings a rare combination of technical depth, research and writing, executive-facing advisory work, and academic program leadership.

CORE LEADERSHIP & SUBJECT-MATTER EXPERTISE

Cyber GRC & Risk: Enterprise cyber risk governance; risk identification and quantification; qualitative/quantitative analysis; risk appetite; strategic risk acceptance; governance strategy

AI Security & Governance: AI security governance; AI/ML threat modeling; adversarial ML; LLM security; generative AI risk; automated security workflows

Security Strategy: Zero Trust; IAM; cloud/hybrid security architecture; vendor and third-party risk; security program maturity; technology evaluation

Regulatory & Frameworks: NIST CSF 2.0; NIST RMF; NIST SP 800-53/61/171; CMMC 2.0; HITRUST; ISO 27001; SOC 1/2; MITRE ATT&CK; NICE

Research & Communication: Research and technical writing; practitioner thought leadership; presentations; stakeholder engagement; curriculum governance; workforce partnerships

PROFESSIONAL LEADERSHIP EXPERIENCE

Founder & Principal Cybersecurity Consultant | Jan 2025 – Present

Cyntraix • Remote

- Established and operate an independent cybersecurity consulting practice delivering security assessments, security architecture, risk governance, and strategic advisory services to SMB and mid-market clients.
- Lead security and risk assessments across networks, systems, and applications; identify vulnerabilities, quantify operational exposure, and develop prioritized remediation roadmaps aligned with NIST CSF and CMMC 2.0.
- Design and advise on cloud, on-premise, and hybrid security architectures using Zero Trust and identity-centric security principles; support AWS and enterprise security environments.
- Deploy and integrate SIEM, EDR, and endpoint security capabilities to strengthen detection, response, and security visibility.
- Advise clients on AI security risk, vendor risk, security governance, and cybersecurity program maturity, translating technical risk into business-aligned investment and prioritization decisions.

Online Associate Faculty – Cyber & Data Security Technology | Mar 2026 – Present

University of Arizona Global Campus • Remote

- Teach CYB102: Network Penetration Testing – Breaching Defenses across multiple concurrent sections in the BS Cyber & Data Security Technology program.
- Connect practical cybersecurity experience to asynchronous instruction, assessment, and feedback while integrating current security concepts and professional practice.
- Engage students in applied cybersecurity analysis, ethical testing, and career preparation across technical and security-focused pathways.

Computer Science Instructor | Jun 2025 – Present

Lawson State Community College • Birmingham, AL

- Partner with the Dean of Career Technical Education and Workforce Development on a full CIS curriculum redesign, consolidating multiple degree tracks into a stackable 67–73 credit-hour pathway with up to 19 courses and embedded short-term certificates.
- Serve as a lead cybersecurity curriculum voice, advising on course structure, certification alignment, ethical hacking and cyber defense offerings, and industry-relevant learning outcomes.
- Contribute cybersecurity expertise to the Cyber ACCESS/ARISE grant initiative, including semester certification-outcome reporting and student success evidence for grant compliance.
- Review vendor proposals for dedicated cybersecurity labs and cyber-range/red-team-versus-blue-team exercises; align instructional environments with workforce requirements.
- Drive AI/ML-integrated cybersecurity curriculum, performance-based assessment, accreditation support, industry advisory collaboration, program planning, budgeting, and student progression.

Cybersecurity Instructor | Aug 2024 – Jun 2025

Syracuse City School District • Syracuse, NY

- Developed and delivered NYSED-aligned cybersecurity curriculum covering ethical hacking, digital forensics, network security, cryptography, and incident response through hands-on labs and project-based learning.

- Integrated AI-powered security tools and emerging technologies while updating curriculum against MITRE ATT&CK and AI-assisted attack trends.

SELECTED EARLIER EXPERIENCE

- IT Support Specialist, Dreamlabs Softwares | 2020–2022 • Enterprise IT support, endpoint security, network infrastructure, physical security, SOPs, and user training.
- IT Officer, Ebonyi State Health Insurance Agency | 2019–2020 • IT support in a regulated healthcare environment, PHI protection, network/endpoint administration, and secure-data training.
- Integration Technician, Total Secure | 2021–2022; Graduate Teaching Assistant, Boston University | 2022 • OT/SCADA and enterprise integration plus undergraduate experiential-learning support.

RESEARCH, SCHOLARSHIP & THOUGHT LEADERSHIP

- Doctoral research: AI-enabled security governance, strategic risk acceptance, autonomous security decision-making, Zero Trust, AI/ML threat modeling, and cybersecurity policy.
- Selected topics: AI security governance; strategic risk acceptance; Zero Trust; IoT/OT privacy; nation-state threat modeling; generative AI; adversarial ML; ransomware and supply-chain lessons learned.
- 30+ research papers and practitioner articles across SSRN, ResearchGate, Google Scholar, and practitioner outlets. ORCID: 0009-0005-7207-8506 | Google Scholar: scholar.google.com/citations?user=KgPm1jsAAAAJ

EDUCATION

Doctor of Engineering, Cybersecurity Analytics | Expected 2027

The George Washington University – School of Engineering & Applied Science • Washington, DC

- Research: Zero Trust, AI/ML threat modeling, cybersecurity policy, NIST RMF alignment, AI-enabled security governance, and risk quantification.

Master of Science, Cyber Forensics | May 2024

University of Baltimore • Baltimore, MD

- Concentration: Digital Forensics, Incident Response, Python security analytics, SOC Operations, HITRUST; research on secure voting, strategic risk acceptance, and incident response governance.

Bachelor of Science, Computer Science & Education (Dual Major) | Oct 2019

University of Ilorin • Ilorin, Nigeria

TECHNICAL & PROFESSIONAL CAPABILITIES

Security & GRC: Cyber risk management, digital forensics, incident response, vulnerability management, security architecture, IAM, Zero Trust, endpoint and cloud security

AI / ML: AI-powered threat detection, adversarial ML, AI risk management, LLM security, generative AI security, automated incident response

Frameworks: NIST CSF 2.0, NIST RMF, NIST SP 800-53/61/171, CMMC 2.0, NICE, MITRE ATT&CK, HITRUST, ISO 27001, SOC 1/2

Tools / Cloud: Splunk, Wireshark, Autopsy, FTK, Magnet AXIOM, Cellebrite, EnCase, Kali, Nmap, EDR, AWS, Active Directory, Linux, Windows, macOS

Programming / Analytics: Python, C++, JavaScript, SQL, PowerShell, HTML/CSS, Power BI, Splunk SPL; curriculum governance, accreditation, workforce development, faculty collaboration

CERTIFICATIONS, AFFILIATIONS & PROFESSIONAL SERVICE

- CompTIA Security+ (2026) • Google Cybersecurity Professional Certificate • IC3 Internet and Computing Core Certification (2026) • Google IT Support Professional Certificate • AI-Powered Software Development & Generative AI Engineering • Google Cloud Introduction to Generative AI • Cisco Networking Basics & Intro to Cybersecurity
- ISSA – Information Systems Security Association • ISACA – Information Systems Audit and Control Association • CAMI – Cybersecurity Association of Maryland • IEEE – Student Membership • MS-ISAC – Member • Cyber Ready Professional Mentor
- Customer Advisory Board Member, ByDesign | 2022–Present • Provide strategic product feedback, UX guidance, and customer advocacy supporting platform development and adoption.
- Leadership: executive communication, technical writing, cross-functional collaboration, strategic planning, stakeholder engagement, committee leadership, public speaking, critical analysis. Languages: English (Professional Proficiency) • Yoruba (Native).
